Subject:

City of Greensboro, NC
Proposal for Engineering Services
Airport Lift Station Replacement Sewer – Bidding and Construction Phase

WATER DIVISION

Dear Mr. Bald:

Date:

April 13, 2017

Arcadis is pleased to submit this proposal to provide engineering services for the Bidding and Construction Phases of the Airport Lift Station Replacement Sewer improvements project. Construction Observation is expected to be provided by the City staff and, therefore, is not included in this proposal. Arcadis will subcontract with Critik Engineering Group for approximately 5% of the Construction Phase Services.

Project Considerations

The Airport Lift Station is nearing its capacity and the City desires to replace it with a gravity sewer connecting to the existing City sewer system. The approximately 8,000 LF of new 16-inch and smaller gravity sewer is intended to eliminate the need for the lift station and provide capacity for the full development of the tributary drainage basins around the Piedmont Triad International Airport. Design of these improvements is complete and regulatory permits and easements are being acquired at this time, therefore construction can begin soon. A nine (9) month construction period is established for the project by the construction Contract Documents.

NC Surveying License # C-1869

Bidding Phase Services

Arcadis will perform the following:

1. Provide information, including drawing sets (two full size and two half size) and Project Manual (two copies) as well as .pdf files of the complete Bidding Documents, to City for advertising as requested.

2. Attend and participate in Pre-Bid conference.
3. Assist City in issuing Addenda as appropriate to clarify, correct, or change the Bidding Documents.
4. Conduct "or equal" reviews of materials or equipment requested during the bid phase in accordance with the construction contract documents. Assumes 1 "or equal" item review.
5. Assist City in evaluating Bids, and negotiating when needed, for the construction work as requested, including a recommendation on bid acceptance based on whether bidder is responsive and responsible and whether bidders' historical performance is acceptable.
6. Consult with City as to the acceptability of subcontractors, suppliers, and other individuals and entities proposed by Contractor for those portions of the Work for which such acceptability is required by the Bidding Documents.

Construction Phase Services

1. Attend Pre-Construction Meeting and monthly Contractor's Progress Meetings throughout the construction phase. Meetings to be conducted by City staff.
2. Provide the City with monthly project status reports and reports from periodic progress meetings held aside from the Contractor's Progress Meetings.
3. Make approximately weekly visits to site throughout the nine (9) month construction period and observe construction to determine in general if Contractor's work is proceeding in accordance with the Contract Documents. Arcadis will communicate with the City any construction related deficiencies in the work or deviations from the contract documents when observed and recommend corrective action. Arcadis will not, during such visits or as a result of such observations of Contractor's work in progress, supervise, direct or have control over Contractor's work, nor will Arcadis have authority over or responsibility for the means, methods, techniques, sequences or procedures of construction selected by Contractor, for safety precautions and programs incident to Contractor's work, or for any failure of Contractor to comply with Laws and Regulations applicable to Contractor's furnishing and performing the Work. Accordingly, Arcadis neither guarantees the performance of any Contractor nor assumes responsibility for any Contractor's failure to furnish and perform its Work in accordance with the Contract Documents.
4. Review and respond to shop drawing submittals from Contractor. Assumes 35 shop drawing items and 5 resubmitted items.
5. Assist the City in issuing clarifications and interpretations of the Contract Documents and Field Orders authorizing minor variations from the requirements of the Contract Documents as necessary. Assumes 5 RFI's and/or FO's.
6. Assist with resolving construction-related issues and conflicts as requested.
7. Recommend Change Orders and Work Change Directives to City as appropriate, and prepare Change Orders and Work Change Directives when requested by the City. Assumes 3 Change Order items.
8. Evaluate and determine the acceptability of substitute or "or-equal" materials and equipment proposed by Contractor as allowed by the Contract Documents. Assumes 1 substitute or "or equal" item review.

April 13, 2017

9. Recommend special inspections or tests of Contractor's work when deemed appropriate. Review all certificates of inspections, tests, and approvals required by Laws and Regulations or the Contract Documents as requested. Arcadis' review of such certificates will be for the purpose of determining that the results certified indicate compliance with the Contract Documents and will not constitute an independent evaluation that the content or procedures of such inspections, tests, or approvals comply with the requirements of the Contract Documents. Arcadis shall be entitled to rely on the results of such tests.
10. Perform a final review of the construction to determine if the completed Work of the Contractor is acceptable, so that Arcadis may confirm the City's recommendation for final payment to the Contractor. Provide a notice that the Work is acceptable to the best of Arcadis' knowledge, information and belief and based on the extent of the services performed and furnished by Arcadis under this Agreement.
11. Provide substantial completion and final payment documentation and other milestone or close-out documentation as requested and for permitting purposes, including assisting the City's field representative with developing punch-lists.
12. Prepare and furnish digital and hardcopy Record Drawings (one reproducible mylar copy and three paper copies) showing appropriate record information based on Project annotated record documents received from Contractor.
13. Provide project certification to NCDEQ-Division of Water Resources at the end of successful project construction.

Responsibilities of the City

It is our understanding that the City will be responsible for the following:

1. Furnish available information pertinent to the project to allow Arcadis to provide the scope of services contained herein.
2. Advertise the project for bids, including payment for advertising and bidding documents.
3. Issuing Notice of Award, developing and distributing the construction contract, and issuing Notice to Proceed to the successful contractor.
4. Attend project meetings including, but not limited to, Pre-Bid Conference, Bid opening, Pre-Construction Conference, construction progress meetings, and Substantial Completion and Final Payment inspections.
5. Provide part-time or full-time field representation (construction observation) services as needed and communicate with Arcadis on the project status and field problems and decisions, including providing Arcadis at the end of each week with copies of daily field reports documenting the work completed.
6. Provide payment for independent testing services as needed.
7. Provide payment for permits, licenses, and inspection fees as needed for the Work to be approved by regulatory agencies.
8. Provide property surveys, construction staking, and establish reference points as needed for the project.

Mr. Robbie Bald, PE
April 13, 2017

9. Arrange safe access onto public and private property for Arcadis to perform the scope of services.
10. Provide, as required for project, accounting, financial, insurance, or legal advisory services to address issues that the City requires, the Contractor raises, or Arcadis reasonably requests and City concurs with such requests.
11. Advise Arcadis of associated project issues as they arise, such as changes in scope or schedule.
12. Give prompt notice to Arcadis when City becomes aware of any environmental condition (hazardous or otherwise), or other developments that affect scope or schedule of the construction Work or services provided by Arcadis.

Fee Proposal

Arcadis proposes to provide the above engineering services on a cost reimbursement (time and materials) fee basis with a 3.2 multiplier on direct labor, plus expenses at a 1.0 multiplier, for \$131,700, realizing that absolute determination of fees for a construction phase project is difficult. The contract maximum fee will not be exceeded without prior authorization by the City. Services requested beyond the nine (9) month construction period shall be considered eligible for additional fees.

Reimbursable expenses are described as follows:

1. Mileage and associated travel costs for employees working on the project at current IRS-approved rate per mile, or reimbursement of rental car rates for staff travelling from other offices.
2. Reproduction of project-related materials by outside vendors.
3. Postage and shipping charges associated with the project.
4. Subcontractor expenses, if any, at a multiplier of 1.0.

We look forward to assisting the City of Greensboro in providing these services. If this proposal meets your approval, please provide a Supplemental Agreement to our existing Agreement for Professional Services for execution. We thank you very much for this opportunity.

Sincerely,

David Hamilton, PE
Vice-President
