

Planning Department
City of Greensboro

December 16, 2014

TO: David Parrish, Assistant City Manager
FROM: Sue Schwartz, FAICP
SUBJECT: Coliseum Inn Property

There have been discussions among Coliseum, Planning and Engineering & Inspections department staff concerning what actions can be taken in the short term to improve the conditions at the Coliseum Inn Property. It has been determined that the fencing not necessary for public safety can be removed, demolition rubble will be removed and rough graded, and the provision of temporary landscaping along the High Point Road side of the property.

This site is being used as a staging area for the construction equipment during the High Point Road Streetscape project. The construction contractor can assist in the debris removal and rough grading. Their entrance to the site will not be from High Point Road so the temporary landscaping would not be affected by that activity.
