RE: Campground Road Shovel Ready Loan Program

Kathi,

Please accept this letter as our formal request for the City of Greensboro to rescind the Shovel Ready Site Loan approved and offered to our site at Campground Road. For the project to be successful and move forward we are requesting the City of Greensboro's help with offsite sewer expenses. Helping with the off-site sewer expenses will enable the project to move forward, and will be significantly more beneficial to the project than the Shovel Ready Loan. With the City of Greensboro's approval, the sewer extension support will allow us to move forward with construction of over 200,000 SF of speculative industrial space on the Campground Road site.

Thank you for working with us on this important project.

Sincerely,
Samet Corporation
