Resolution Approving Bid in the Amount of \$105,820 and Authorizing Contract with Environmental Conservation Laboratories (ENCO) for Laboratory Services for the White Street Landfill Operations

Department: Field Operations
Council District: 2

Public Hearing: N/A
Advertising Date/By: N/A

Contact 1 and Phone: Dale Wyrick 336-373-2783
Contact 2 and Phone: Chris Marriott 336-373-7612

PURPOSE:

City Council is requested to approve the following contract proposal from Environmental Conservation Laboratories (ENCO) to support Field Operations with water quality laboratory analysis, necessary to meet state and federal permit requirements to monitoring soil, groundwater, surface water and stormwater at the White Street landfill for the City of Greensboro. One routine service expected would be the semi-annual groundwater and surface water compliance monitoring analysis required for the White Street landfill facility. Additional services may include storm water, and soil analysis to comply with requests by NCDEQ and EPA. Field Operations is requesting that City Council a three year contract (with two additional one-year optional extensions which would expire in 2023). The estimated 5-year contract value is \$105,820 (approximately \$21,164 per year), which requires City Council approval.

BACKGROUND:

On October 19, 2018, Field Operations Department issued the attached RFQ to qualified and experienced firms for Professional Laboratory Services - Landfill related to groundwater, surface water, stormwater and soil quality analysis for the City of Greensboro. The RFQ was publicized through media outlets, professional organizations and direct e-mailings. The solicitation attempted to identify and included minority and women

business enterprises (M/WBE) outreach within the 10-county region. The M/WBE office has determined that there are no M/WBE laboratories within the HUB and only one M/WBE laboratory located within the state of North Carolina, and that laboratory was contacted via direct e-mail. Only two laboratories responded to the RFQ, neither of which were the aforementioned M/WBE laboratory. The current contract is due to expire in March 2019.

Each firm's response met the following minimum qualifications:

- complete and accurate submittal of the specific RFQ components,
- satisfactory North Carolina certifications for the specified analyses, and
- understanding of current and pending laboratory analyses related to landfill parameters.

A review committee of the Field Operations Department, Water Resources Department, and the M/WBE office reviewed all submitted Statements of Qualifications that were received.

ENCO was selected as the best qualified firm to perform services based on:

- Qualifications and experience of ENCO's project team;
- ENCO's understanding of the needs of the City and this extensive experience with the White Street Landfill; and
- Established relationships with the Solid Waste Regulators with the NCDEQ and ENCO's understanding and experience related to new regulatory requirements.

ENCO has submitted the attached Task Order Proposal for an initial task, which has been reviewed and approved by the Field Operations Department. The contract term is for three year contract (with two additional one-year optional extensions which would expire in 2023). The total recommended budget is projected to be \$21,164 per year annually based on the current solid waste and stormwater permit required sampling parameters and frequency.

Requested Actions

It is estimated that annual expenditure is anticipated to be the approximately \$21,164 per year annually. This annual estimate will be affected if Council directive changes or as state and federal regulations change over the tenure of this contract.

BUDGET IMPACT:

The initial contract term is for the estimated 5-year contract value is \$105,820 (approximately \$21,164 per year). Funding for this contract is available in the Solid Waste Management Fund in account number 551-4306 -04.5918 and in the Solid Waste Capital Improvement in account number 554-6509-01.5918.

RECOMMENDATION/ACTION REQUESTED:

It is recommended by the Field Operations Departments that City Council approve the bid and contract award to Environmental Conservation Laboratories (ENCO) for Laboratory Services to address water quality compliance monitoring at the White Street Landfill in the amount of \$105,820.
